

System Five on Cloud

Introducing a Whole New Way of Using *Windward System Five*

Since 1984, Windward's flagship software, *Windward System Five*, has grown and improved in collaboration with **real business owners**, by finding innovative and easy-to-use solutions to their problems.

Windward helps you simplify and automate the day-to-day processes of running your business. *System Five* integrates front-end point-of-sale with back-end inventory management, ordering, reporting and accounting, all in one database.

Now, you can access the same, robust Business Management Software, with a modern twist.

Introducing Windward System Five on Cloud.

- » Same proven software, delivered and serviced in a new format option.
- » Experience the full desktop functionality of *System Five*, but entirely managed by Windward Software.
- » Improves cash flow and convenience.
- » Saves you time, money and headaches - let us take care of the technical side of your business, so you can focus on other things.

Call us today to discuss how your business can feel as light as a cloud.

*We help you run your business.
From our desk or yours.*

Ask Us How.

Why Choose “on Cloud”?

1. Identical User Experience

- » Cloud-based virtual desktop on your computer gives you business as usual.
- » Enjoy the same *System Five* performance and features.

2. Lower Costs with More Convenience

- » Lower initial costs to get started; no need to purchase a server.
- » Low monthly cost per user instead of higher up-front payment.
- » All updates and backups are automatically completed.
- » Log in from home or on the road at a trade show.

3. Eliminate Technical Responsibilities

- » All technical aspects are handled by the Windward team, so there is no requirement to employ an IT person in-house.
- » No need for you to spend time downloading updates nor worry about data loss.
- » Your data is securely stored off-site from your physical location and managed by Windward.
- » You retain ownership of your data, unlike other cloud-based software solutions.

4. Same Expert Customer Support

- » Weekly implementation training and tutorials for your entire staff.
- » Live, global phone support, 24 hours a day, 7 days per week.

“Prior to using Windward Software, we employed a collaboration of three different programs, which was a confusing and ineffective approach. For example, it would take three or four days to determine our cash flow. Since we incorporated Windward Software, our business is running exceptionally smoothly. Every day, I can easily report my deposits, clear my cash accounts, and stay right on top of my money situation. It also gives me much more time to focus on growing my business through researching sales trends and developing marketing.”

PRICING

WINDWARD SYSTEM FIVE ON CLOUD

Users ^φ	Base Price* (Per User)	Monthly Subscription [‡] (Per User Per Month)
2-5	\$ 1,865.00	\$ 149.00
6-10	\$ 1,615.00	\$ 119.00
11-20	\$ 1,495.00	\$ 110.00
21-30	\$ 1,445.00	\$ 105.00
31-50	\$ 1,415.00	\$ 99.00
51-100	\$ 1,380.00	\$ 92.00
100+	Please contact Windward Software directly for pricing: +1 (800) 663-5750.	

^φUser Count is based on Concurrent Users (i.e., maximum number of users logged into the system at any given time.) Customers can have up to 2x the Concurrent User Count for Named Profiles before additional fees may apply.

*Base Price is a one-time system implementation fee calculated on a per-user basis. **Hardware not included.**

[‡]Monthly Subscription fees are in addition to the one-time base price, and a total of one-year of monthly fees is due upon signing. Includes Microsoft Azure Cloud Computing Platform subscription, ongoing system maintenance, 24/7/365 technical support, system updates & upgrades, and access to the Windward Learning Academy.

Please note: Base Price fees will be waived until October 31, 2018 for all existing *Windward System Five* server-based customers wishing to migrate to *Windward System Five on Cloud*. After this date, existing clients will be required to pay 15% of base fees to complete the system platform transition from server to cloud.
