

Home Goods

Your Home Goods business doesn't fit into a box. Neither should your business management software.

Since 1984, Windward's flagship software, *Windward System Five*, has always been developed in collaboration with **real business owners**, by finding solutions to their problems.

We help you simplify and automate the day-to-day processes of running your business with proven software that integrates front end POS with back-end inventory management, ordering, reporting and accounting, all in one database.

- » Customized solution for Home Goods businesses from boutiques to multi-million dollar enterprises.
- » Manage thousands of inventory items over multiple locations, warehouses, distributors, suppliers, online and off-line.
- » Set your business up for long term growth, with the security of knowing you have a business management software system in place that can grow with your vision.

Call us today to discuss how the right software can make you feel right at home in your business.

*Over 30 years experience in the Home Goods industry.
Partners with multiple buying groups from across North America.*

We help you run your Home Goods business.

So you can help your customers create their homes.

Why Choose Windward for Your Home Goods Business?

A Word From Our Clients

"In 2003, we moved our Home Goods business into a 54,000 square foot building with a warehouse, carrying a very large inventory of product. A couple of years ago, as the business grew from a small to a big operation, we realized that we needed business management software. After reviewing several options, the absolute best provider we found was Windward Software. Their solution is very easy to operate, yet it provides all of the detailed functionality we require. Not to mention that the Windward sales and support teams are knowledgeable, outgoing and reliable people. We really should have had this software at the beginning of the year 2000."

- Joe Kondola, Owner
Kondola's Furniture & Appliances
Penticton, BC

1. Commission Tracking Made Easy

- » Detailed salesperson analysis reports.
- » Track commissions by automating set up with multiple parameters.

2. Fast, Accurate Selling

- » Sell a group of items with a single keystroke.
